PROFESSIONAL SUMMARY

Full Stack Developer (B.Tech CSE, 2027) experienced in building 3 AI-powered web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Skilled in translating complex technical requirements into scalable architecture, reusable code, and optimized database design. Experienced in Agile sprint delivery, SQL queries, CRUD operations, REST API development, and problem solving — improving performance and scalability while aligning with product roadmap goals.

PROJECTS

- AI Virtual Assistant

React.js | Node.js | Express.js | Gemini API | REST API | Web Speech API

 - Architected a real-time full-stack AI assistant with scalable Node.js backend and reusable React component libraries, reducing query resolution time by 40% through context-aware streaming responses.
 - Implemented Tool Calling and AI Agents via Gemini API for dynamic task execution; optimized API performance and scalability achieving 35% faster response time and 90% query accuracy.
- AI Document Learning Assistant

React.js | Node.js | Express.js | MongoDB | MySQL | Gemini API

 - Designed scalable database design and schema (MongoDB + MySQL) with SQL queries and query optimization, supporting 50+ concurrent users and reducing content creation time by 60%.
 - Built reusable backend modules for AI-powered content generation via Gemini API, accelerating processing by 3x while following best practices for documentation and CRUD operations.
- AI Code Review Assistant

React.js | Node.js | Gemini API | REST API | JavaScript

 - Developed AI-powered code analysis tool with reusable review modules, cutting manual review time by 50% for 20+ active users and improving bug identification accuracy by 45% across multiple languages.

EDUCATION

- Bachelor of Technology - Computer Science and Engineering

Jan 2023 - Jan 2027
- Sagar Institute of Research and Technology Excellence, Bhopal | Min. 70% criteria met

Coursework: Data Structures and Algorithms, DBMS, OOP, Web Technologies, Computer Networks, SQL and Database Design

TECHNICAL SKILLS

- Languages:

JavaScript, C++, HTML5, CSS3, SQL
- Frontend:

React.js, Tailwind CSS, Responsive Web Design, Reusable Component Libraries
- Backend:

Node.js, Express.js, REST API, CRUD Operations, Scalable Architecture, Stored Procedures
- Databases:

MongoDB, MySQL, Database Design, SQL Queries, Query Optimization
- AI & APIs:

Gemini API, Tool Calling, AI Agents, Prompt Engineering, SSE Streaming
- Tools:

Git, GitHub, Postman, VS Code, Agile Development, Sprint Planning
- DSA Topics:

Arrays, Sliding Window, Binary Search, Trees, Recursion

ACHIEVEMENTS

- Solved 200+ LeetCode problems across Arrays, Sliding Window, Binary Search, and Trees — demonstrating strong problem solving and analytical skills for deep technical decision-making.
- Independently built 3 end-to-end AI-powered full-stack applications with 40-60% reduction in operational time and 90%+ query resolution accuracy.
- Applied Agile sprint methodology and Git version control across all projects ensuring timely, high-quality, bug-free deliveries aligned with product roadmap and stakeholder requirements.
